PART I: ACCESS TO INFORMATION FROM WRITTEN TEXTS (70 points)

Read the report below and then answer questions 1-8.

RACING INTO SPACE

If you look up "space tourism" on the Internet these days, you may be surprised by what you find: There are currently numerous space tourism agencies worldwide, and more are opening up all the time. Some will take you on a brief trip above the Earth's atmosphere. Others will send you on a vacation in a space hotel, and still others are
5 planning space stations complete with museums and movie halls. All these businesses are attracting investors, who are prepared to risk hundreds of millions of dollars to build such futuristic projects.

"We're very excited about space tourism," says John Vale of Galaxy Travel. "We expect to be profitable within three years after we start operations." There is good reason for
10 such optimism. Even though the first flights are only scheduled for 2010, thousands of people in more than 30 countries have already paid as much as \$150,000 to \$200,000 for a trip into space.

Profits will come not only from the sale of tickets. "Before the flight, space tourists will have to receive several days of training," explains Vale. "We want their family and
15 friends to come to the training site too, where they will find an adventure park with flight simulators, restaurants where everyone can taste space food, and other unique attractions. In other words, we will offer space-related activities here on earth that will be almost as exciting as the experience in space."

Some experts predict that by 2015, as many as 17,000 tourists could be traveling to
20 space every year. But not everyone is thrilled by this prospect. Environmental groups are concerned about the pollution caused by rocket fuel. There's also the question of safety. "These tourist vehicles must be thoroughly tested before we can even talk about commercial operations," says Marco Caceres, a space industry specialist. "In space, anything can go wrong."

25 But the future space tourists are not deterred. Says Pierre Laronde, who signed up for a 2014 flight, "I'm certainly aware of the dangers, and I've thought about them. But I've never even considered not doing it."
